

ELECTRICAL TESTING ENGINEER

We are looking for an experienced Test Engineer to join our Operations team in an established family-owned business in Leeds. Wilson Power Solutions are a leading manufacturer and supplier of electrical power distribution equipment and pioneers of super low loss amorphous transformer technology. Our flagship product saves money, saves energy, cuts carbon and offers an innovative solution to the worldwide challenge of reducing energy wastage.

The Role:

Reporting to the Senior Testing Engineer; key responsibilities will be the testing, repair and troubleshooting across the range of company products both inhouse and on site.

- In-house testing of transformers/marshalling enclosures/control panels
- Testing of LV cabinets and control devices
- Complete protection modifications

Knowledge and Experience:

- Minimum of 5 years testing experience within an electrical engineering company
- Experience of testing and commissioning transformers essential.
- Hold electrical qualifications and have knowledge of electrical regulations is essential
- The ability to understand electrical schematic drawings is essential
- Clear understanding of Health & Safety & Risk Assessment policies and responsibility
- Have good written and verbal communication skills
- Experience of working collaboratively with other operations personnel
- Ideally experience of working within a continuous improvement environment
- Strong attention to detail with a methodical approach
- Good communication skills
- Flexibility to assist in other departments when required

Salary and benefits:

- Salary negotiable
- 25 days holiday per year plus bank holidays
- Company Profit Share Scheme
- Nine-day fortnight, plus two paid breaks
- Healthcare cash plan and EAP scheme
- Excellent canteen facility with tea, coffee and milk provided
- Pension
- EV salary sacrifice scheme and EV charging
